EDUCATION

- National Institute of Technology, Patna** 2023-27
B.Tech in Electronics and Communication Engineering CGPA: 8.9

EXPERIENCE

- Google – Google Student Ambassador** Aug 2025 – Present
 - Led AI-focused campus initiatives and workshops engaging 250+ students.
 - Promoted Google tools (Gemini, Cloud, Developer programs) through events and campaigns.
 - Acted as a bridge between Google and the student community to drive tech adoption.
- IEEE Student Branch, NIT Patna – ML Team Member** Jun 2025 – Present
 - Actively participated in AI/ML workshops and technical sessions organized by IEEE.
 - Collaborated on ML projects, debugging and resolving issues through peer discussions.

PROJECTS

- AI Chatbot with Gemini API: Intelligent AI Assistant** March 2025 
Tools: Python, Tkinter, Gemini API, FPDF, Requests, JSON
 - Designed an AI assistant using Gemini API to provide intelligent responses based on user prompt.
 - Implemented GUI for interaction and note taking from the API response.
 - Added customizable bot presets with an option for users to define their own AI personas.
 - Created a notes-saving feature allowing users to store and export interactions as a PDF.
- Face Mask Detection: Deep Learning-based Mask Classification System** Present  
Tools: Python, TensorFlow/Keras, OpenCV, NumPy, Matplotlib, Streamlit
 - Built and deployed a CNN-based model achieving ~97% accuracy for detecting masked and unmasked faces.
 - Enhanced model performance using data augmentation, batch normalization, and dropout regularization.
 - Developed a Streamlit web app enabling real-time image upload and instant mask detection results.
 - Evaluated model with precision, recall, F1-score, and accuracy metrics for performance validation.
- Movie Review Classifier: Sentiment Analysis using ML/DL** Present 
Tools: Python, Scikit-Learn, TensorFlow, NLP, FastAPI, Docker, Azure
 - Developed a sentiment analysis system using ML/DL and NLP to classify movie reviews as positive/negative.
 - Built and evaluated multiple models, achieving 88.05% accuracy with Neural Networks.
 - Created a REST API with FastAPI and containerized the application using Docker.
 - Published the Docker image to Docker Hub and deployed the application on Microsoft Azure for cloud access.

SKILLS AND INTEREST

- Programming Languages:** C/C++, Python, JAVA, HTML, CSS, JavaScript, SQL
- Technologies:** Machine Learning, Deep Learning, NLP, DS, Data Preprocessing, Model Evaluation
- Frameworks:** Numpy, Pandas, Matplotlib, TensorFlow, Scikit-Learn, Keras, Seaborn, Tkinter
- Tools:** Visual Studio Code, Jupyter Notebook, Microsoft Azure, Git, Github, Docker
- Libraries:** Hugging Face, ollama, Gemini API, Streamlit, Flask, FastAPI, Postman
- Areas of Interests:** Competitive Programming, Cloud Computing, AI-ML, DBMS, OS, DSA, OOPs, CN

CERTIFICATIONS

- Machine Learning Specialization, Stanford University** [View Certificate](#)
- Advanced Learning Algorithms, Stanford University** [View Certificate](#)
- Neural Networks and Deep Learning, Stanford University** [View Certificate](#)
- Essentials with Azure Fundamentals, Microsoft** [View Certificate](#)
- Technical Support Fundamentals, Google** [View Certificate](#)
- Building LLM Powered Apps, Udemy** [View Certificate](#)

ACHIEVEMENTS

- Qualified as National Semi-Finalist in Flipkart GRiD 7.0 among top engineering students across India.
- Codolio-verified portfolio: 1200+ problems solved and 80+ contests attended across major platforms..
- Maintained a CodeChef rating of 1800+ in contests with 600+ problems solved (4 star).
- Achieved a Codeforces rating of 1200+ (max) pupil through CP contests.
- Earned LeetCode Knight (max rating: 1900+) with excellent problem-solving ability.
- Ranked in the top 450 out of 20000+ applicants in ATF 2024, reaching the final interview round.
